# **1. SAFETY GUIDE**

## **1.1 SAFETY RULES**

1. Prior to operating the machine, please read through this manual completely.
2. Maintenance personnel should go through this manual prior to operating the machine.
3. Prior to maintaining or cleaning the machine, please turn off main power.
4. If any accidents occur while machine is running, turn the power off at once.
5. This machine is not designed for packing explosive material.
6. We do not take any responsibility for unauthorized conversion.
7. Personnel need to be trained prior to operating the machine.
8. Machine should be placed in a location that would be out of harms way.
9. If machine has Top Compression Plate option, turn off the air prior to adjusting or maintaining of machine.
10. For safety, all interlock switches should not be disabled.
11. Do not stand on the turntable, or underneath the film carriage when machine is in operation.
12. Pallet loads should not be over the specified maximum height and weight.
13. If pallet load is too light and load would shift when turntable is on, the optional top compression plate should be used.

## 1.2 CAUTION SIGNS

See Fig. 1-1

Components with this sign should be accessed only by trained operator or maintenance personnel

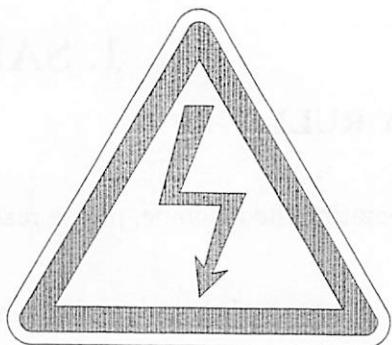

Fig. 1-1 Electrical Caution Sign

See Fig. 1-2

Keep hands out of this area.

Fig. 1-2 Warning

### 1.3 SAFETY PROCEDURE

#### See Fig. 1-3

Don't put finger between the turntable and the base of the machine. Serious injuries may occur.

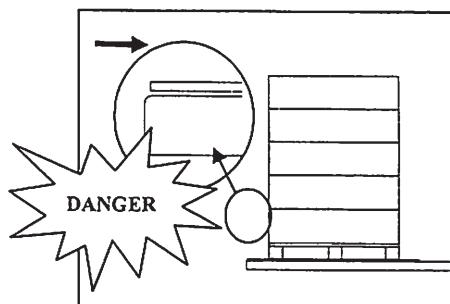

Fig.1-3

#### See Fig 1-4 Care for press-hurt !

As the machine is running or technician is maintaining , prohibit any person close the under of carriage, avoid the carriage to cause hurt when it is lifting down .

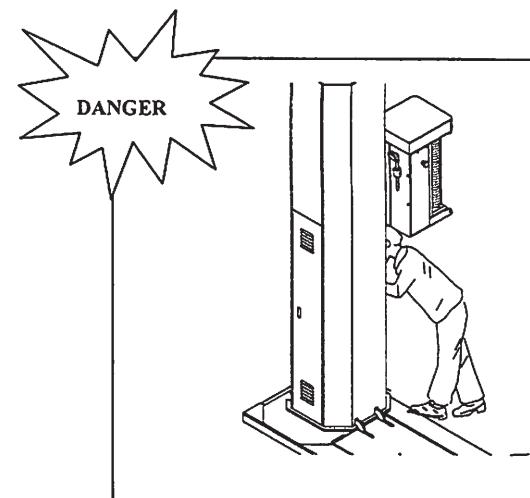

Fig. 1-4

#### See Fig. 1-5

Don't put hands the area between the film carriage and the column while machine is running.

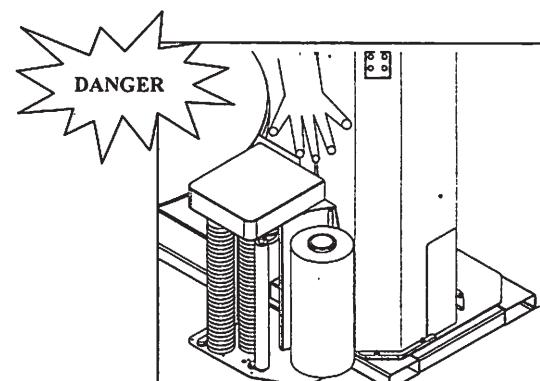

Fig.1-5

**See Fig. 1-6**

Don't touch the pallet when the machine is running.

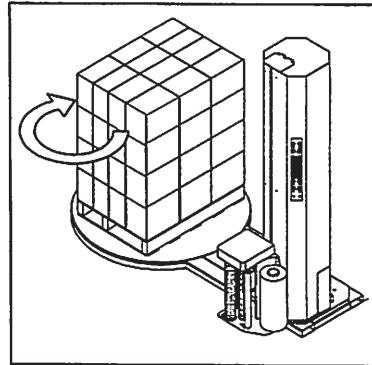

Fig. 1-6

**See Fig. 1-7**

Don't stand on the turntable when machine is running.

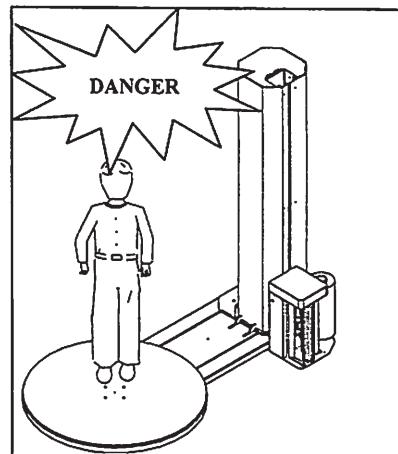

Fig. 1-7

**See Fig. 1-8**

Don't stand between the column and the pallet when machine is running.

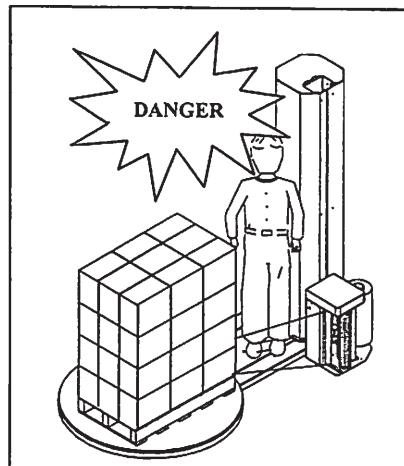

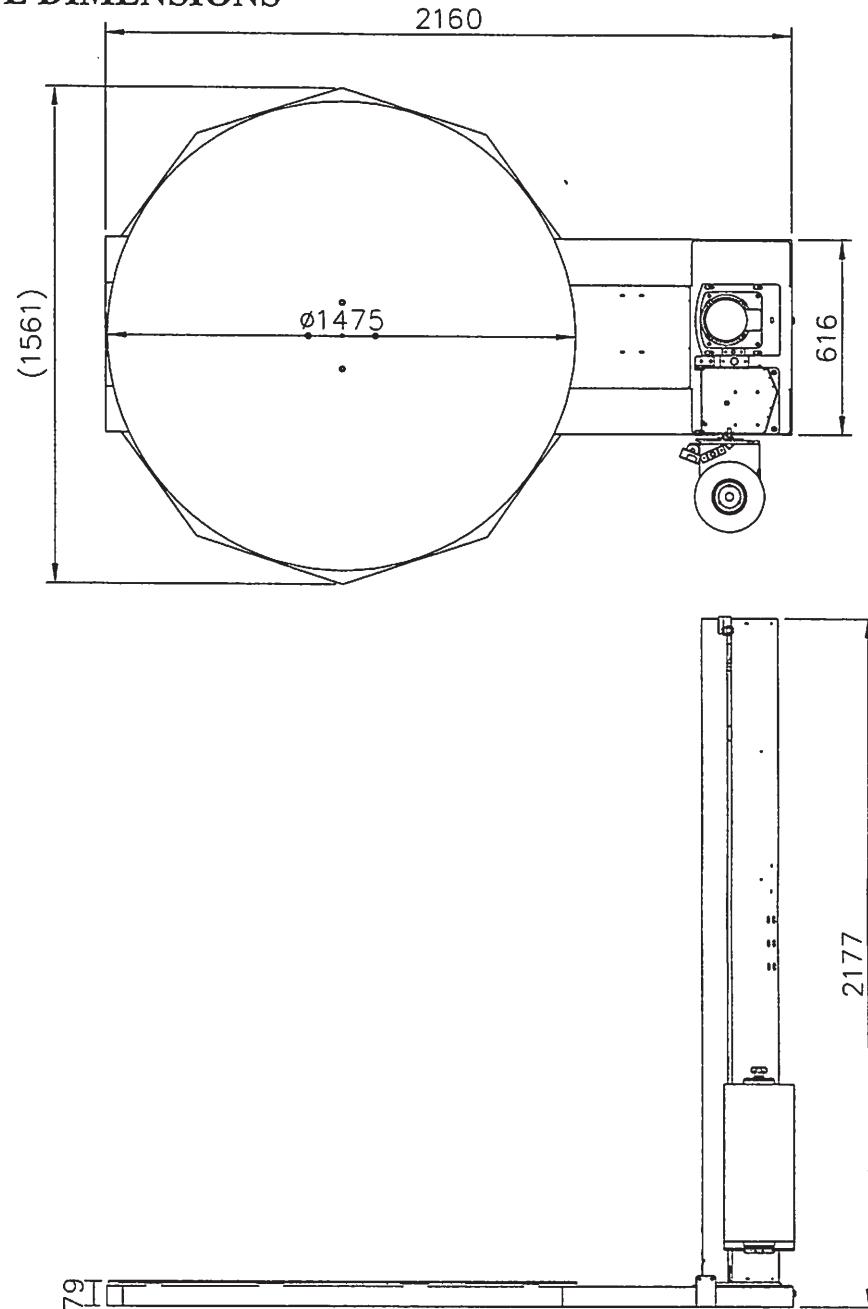

Fig. 1-8

## 2. MACHINE DIMENSIONS

### 2.1 MACHINE DIMENSIONS

### 2.2 MACHINE SPECIFICATIONS mm(inch)

Machine Specifications mm(inch)	
length	2160m(85.04")
width	1581mm(62.24")
height	2177mm(85.70")
Turntable diameter	Ø 1475mm
Turntable height	79mm(3.11")
Maximum load	1300 kg / 2900lbs.

## 2.2 FILM CARRIAGE ASSEMBLY

(Per Fig. 2-1)

(A) FILM

(B) ROLLER

(C) PHOTO SENSOR FIXED PLATE

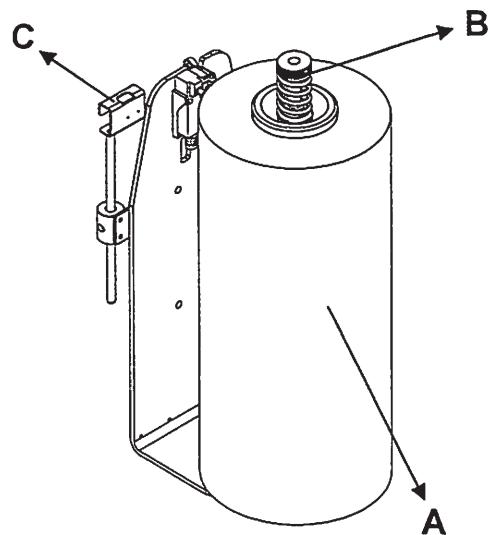

Fig 2-1

Per Fig. 2-2

Film roll dimensions

(Per table below)

Description	Specification
Film Quality	LLDPE
Film width	500 mm
Film Length	1000 m, 1500 m
Film Thickness	15 $\mu$ , 16 $\mu$
Film carriage diameter	Ø76 mm

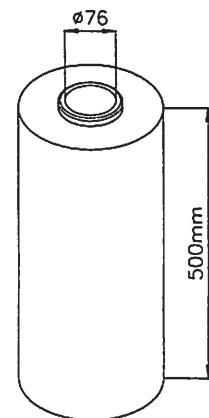

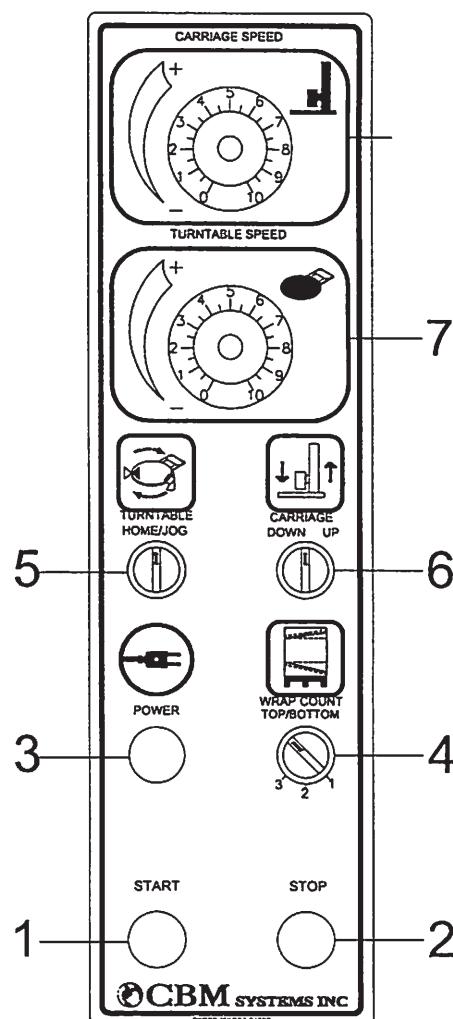

Fig. 2-2

### 3. OPERATIONS AND ADJUSTMENT

#### 3.1 CONTROL PANEL :

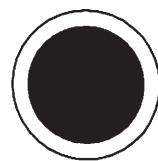

ITEM	DESCRIPTION
1	Start
2	Stop
3	Power Light
4	Wrap count top/bottom
5	Turntable home(turn left)/Turntable manual jog(turn right)
6	Manual carriage up/down switch
7	Turntable speed

### **3.2 OPERATION**

#### **STRAT : (Per Fig 3.2-1)**

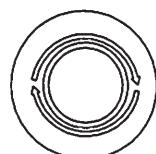

When the above settings are set and the start button is pushed, the machine will automatically go through its functions based on the settings.

**Fig 3.2-1**

#### **STOP BUTTON: (Per Fig 3.2-2)**

- ◆ When stop is depressed, the button will lock.  
To reset, turn clockwise then pull out.
- ◆ When button is reset, start button needs to be  
Depressed again to start.

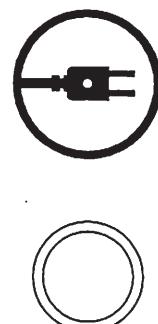

**Fig 3.2-2**

#### **POWER LIGHT: (Per Fig 3.2-3)**

Plug the power line to an outlet, then open the electrical box and turn on the main switch.

Check if the power lamp turns on.

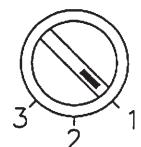

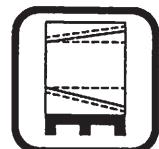

**Fig 3.2-3**

#### **WRAP COUNT TOP/BOTTOM SWITCH :**

##### **(Per Fig 3.2-4)**

Shift to position1, TOP/BOTTOM wrap 1 loop each.  
Shift to position2, TOP/BOTTOM wrap 2 loop each.  
Shift to position3, TOP/BOTTOM wrap 3 loop each.

**Fig 3.2-4**

## TURNTABLE HOME(TURN LEFT)/ TURNTABLE MANUAL JOG

### (TURN RIGHT): (Per Fig 3.2-5)

- ◆ Turntable home button push once.
- ◆ Turntable will turn slowly until home position is sensed, then the light will turn on.

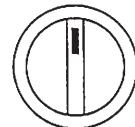

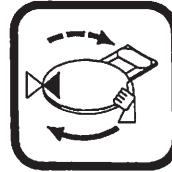

Fig 3.2-5

## MANUAL CARRIAGE UP/DOWN : (Per Fig 3.2-6)

- ◆ Turn right to move up.
- ◆ Turn left to move down.

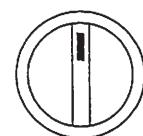

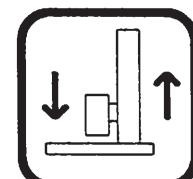

Fig 3.2-6

## TURNTABLE SPEED: (Per Fig 3.2-7)

Clockwise turn will increase turntable speed.

Counter clockwise turn will decrease turntable speed.

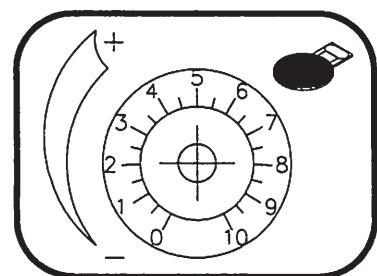

Fig 3.2-7

### 3.3 DESCRIPTION OF OPERATION (Per fig. 3-3-1)

1. Place pallet load on the turntable with forklift, place pallet directly on the turntable. If pallet jack is used, please use a ramp. (Optional accessory)

※PLEASE POSITION PALLET ON THE CENTER OF THE TURNTABLE

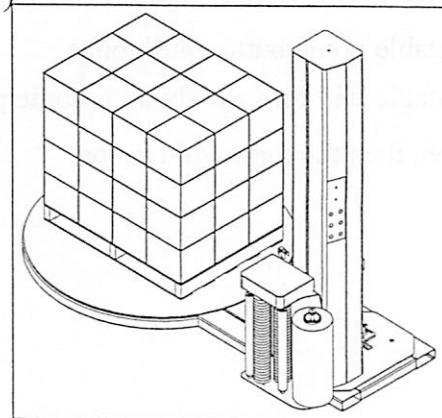

Fig. 3-3-1

2. Manually attach film to the lower portion of the pallet. (Per fig.3-3-2)

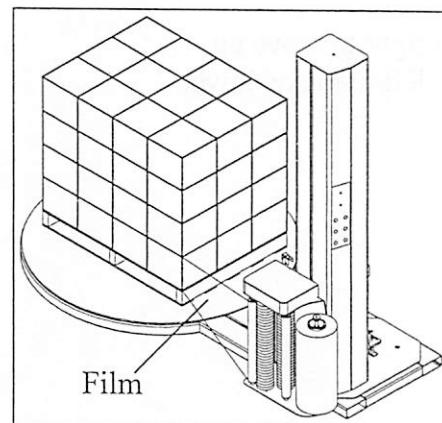

Fig. 3-3-2

3. Press-down start button to wrap automatically.
4. Prop up the carriage top blocker to prevent film loose.  
(Per Fig. 3.3-3A)

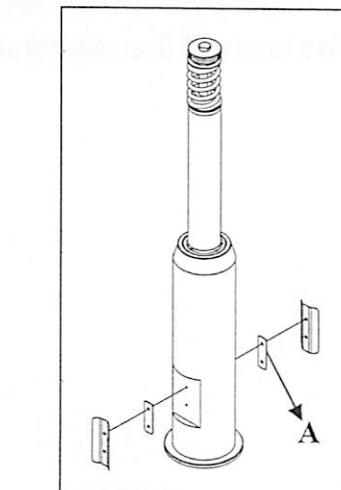

Fig. 3-3-3

5. Press-down start button to wrap automatically.
6. After wrapping, cut the film in blade, then have the end of film stick to package that the wrapping action has finished.
7. Could use forklift or cart to move the package.

## 4. CLEANING

### CLEANING

1. To extend the life of machine, regular maintenance should be made.
2. Turn off machine and unplug electrical cord.
3. Annually, take off turntable plate and blow clean turntable housing.
4. Clean film carriage of film waste.
5. Keep machine surrounding clean to avoid getting unwanted objects into machine.
6. If motor can't rotate please check the carbon is damage or not. (Per Fig. 4-1)

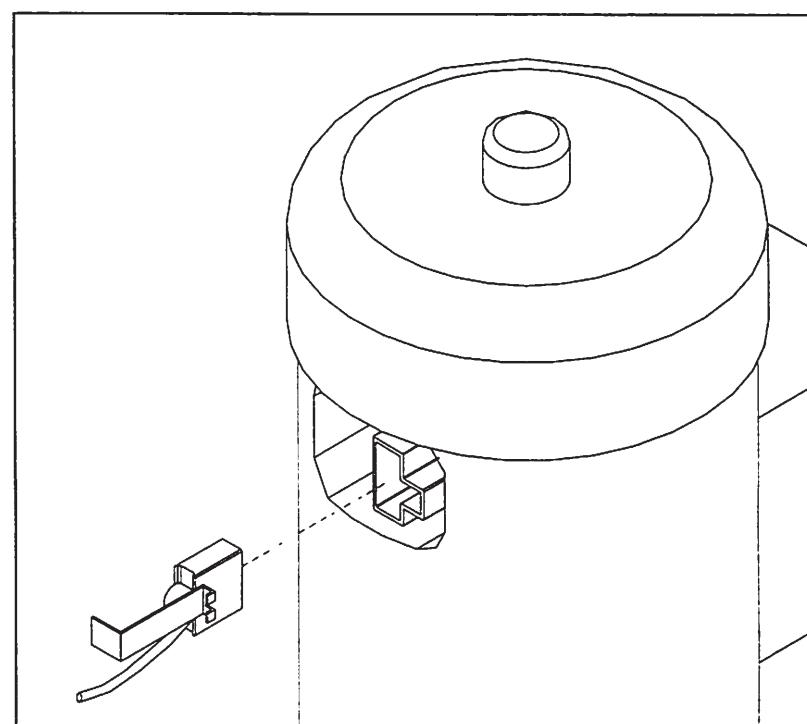

Fig. 4-1

## 5. FILM INSTALLATION STEPS

Follow step 1~2, please have film aimed at stretch mount shaft and put down.

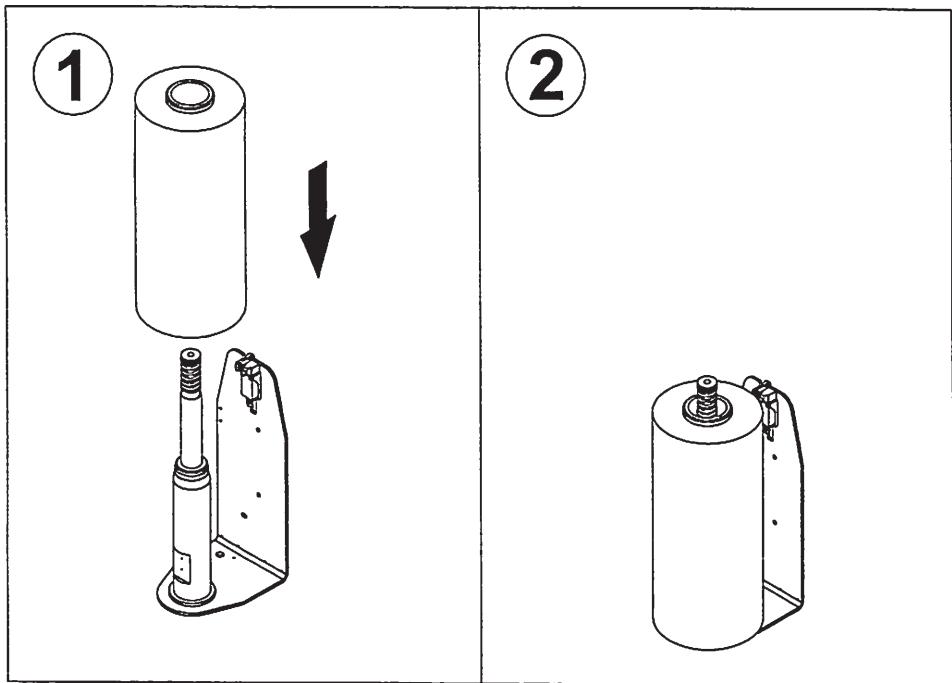

圖.5-1

## 6. ADJUSTED SENSOR TO CHECK WRAPPING HEIGHT

1. To check height of wrapped packages, use sensor attached to film carriage, Sensor mount could be adjusted for top and bottom of packet, if adjusted down the sensor will delay in releasing package that can have package.

PS. Release screw to adjust distance as needed (Fig 6-1, A), adjust to needed distance (Fig 6-1, B).

2. Adjust the distance of photo sensor :

(1) The distance is 0~9 grade (Fig 6-1, C).

(2) Regularly set on the biggest sensing distance 9(=2M).

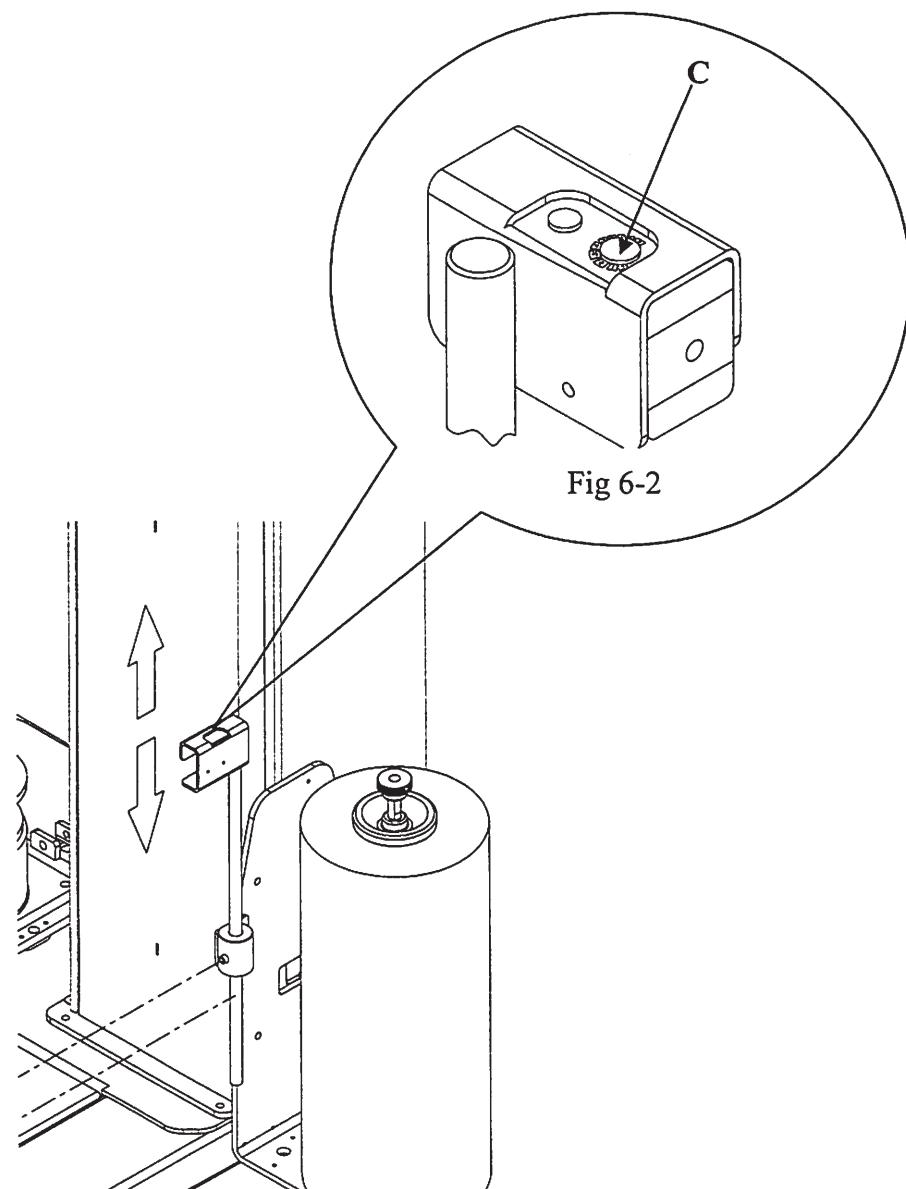

Fig 6-1

## **7. TROUBLE SHOOTING**

**※FOR YOUR SAFETY, SHUT DOWN MACHINE, SWITCH OFF POWER SUPPLY BEFORE DOING ANY CHECK, MAINTENANCE.**

### **1. POWER SUPPLY NO RESPONSE :**

- (1) Check fuse.
- (2) Check cable connection.
- (3) Check breaker inside control box .
- (4) Check general power supply.
- (5) General power is with 20 amp break protector, share to 5amp and 3amp breaker to do protect overload.

### **2. POWER INDICATOR IS NOT ON :**

- (1) Check if bulb burnt out.

### **3. CARRIAGE STUCK :**

- (1) Check if top/bottom limitation switch is damaged.
- (2) Check function of carriage motor, reducer, right turn, reverse turn.
- (3) Check if wire connection o.k., or disconnected.
- (4) Check if sensor if damaged which is used to detect pallet height

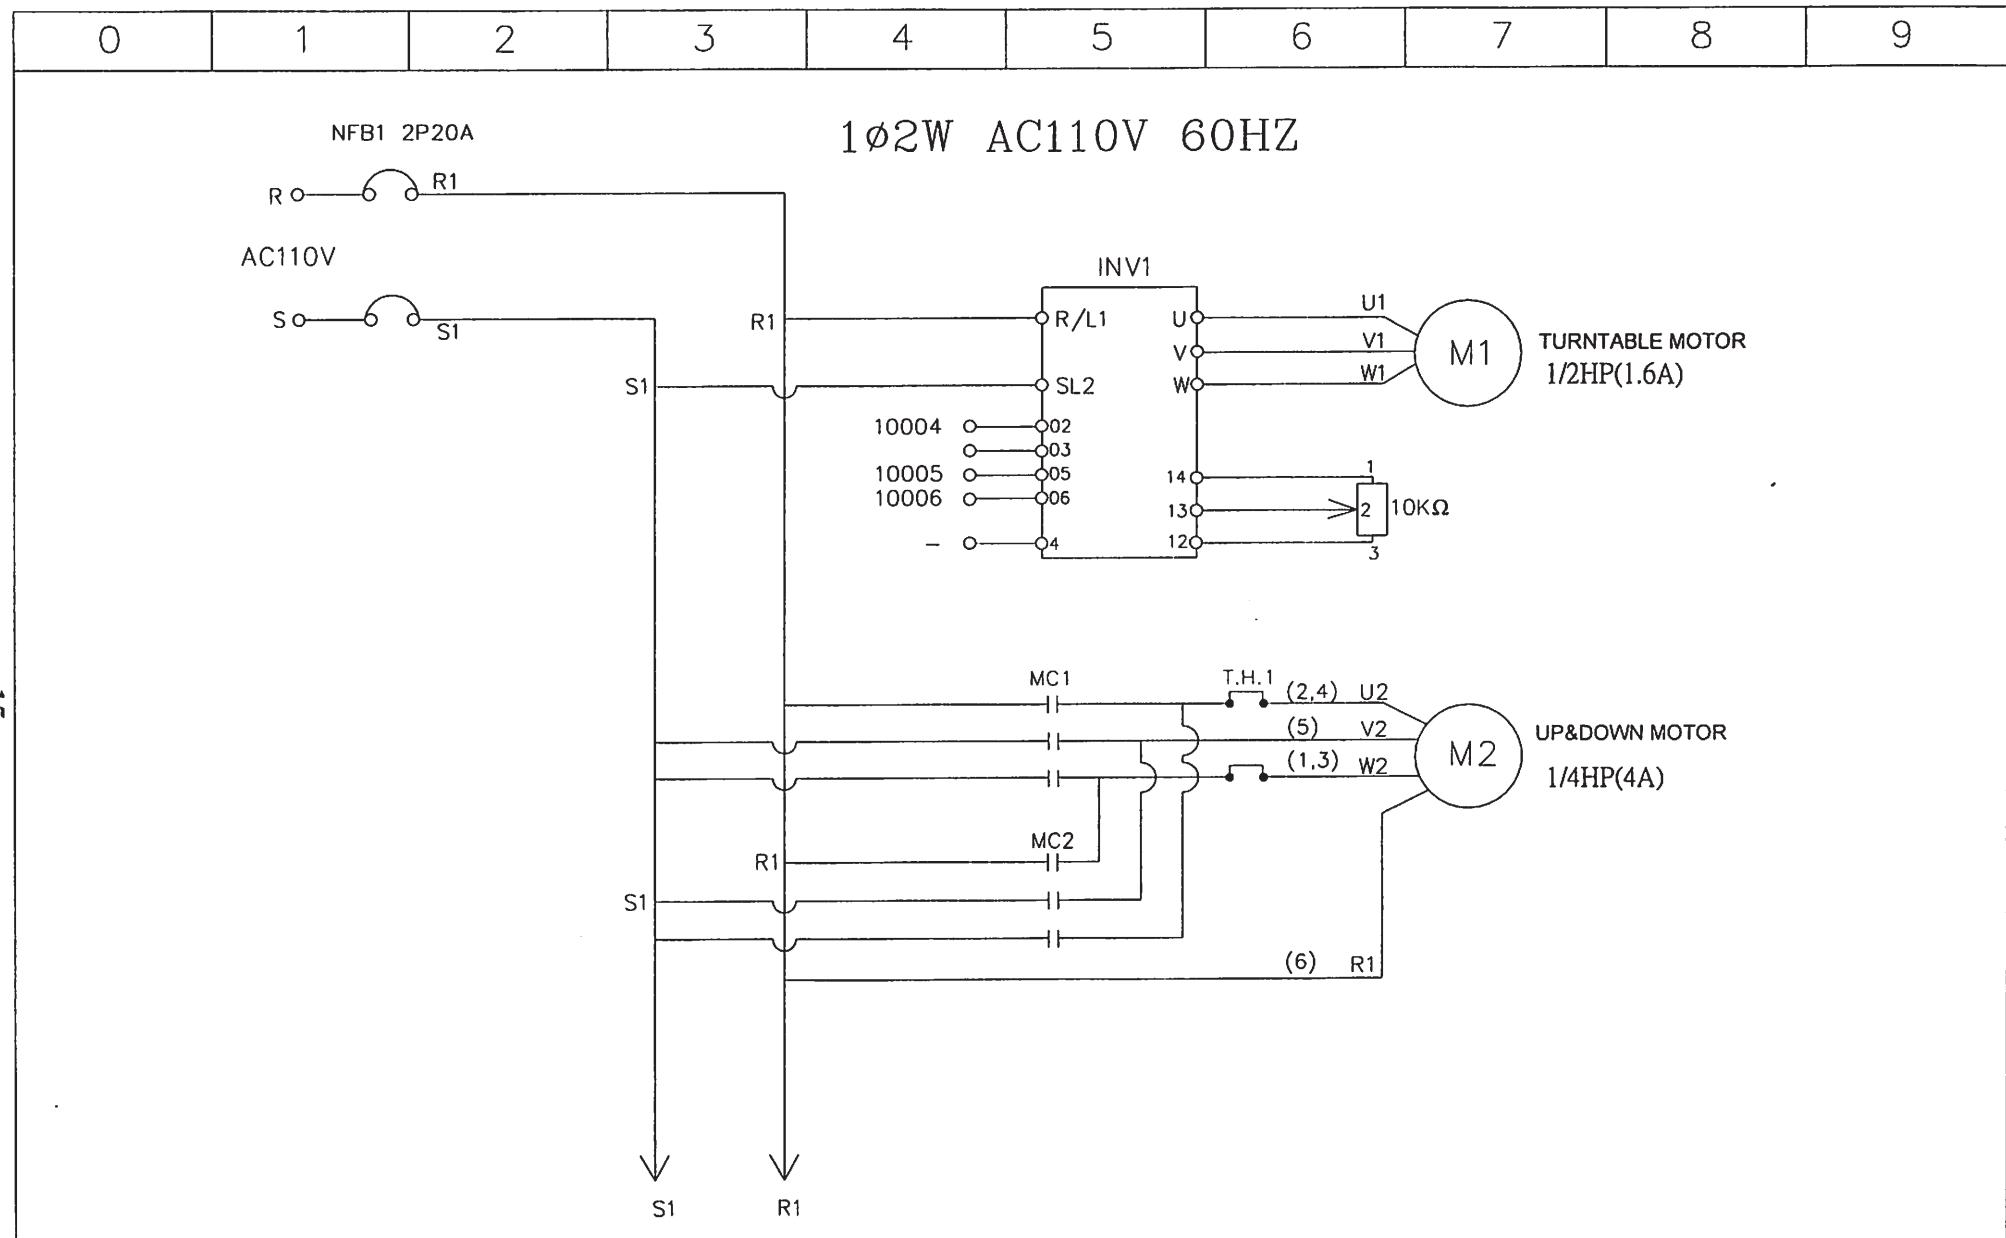

### **4. HOW TO EXTEND TENSION OF PRE-STRETCHED FILM :**

- (1) Film carriage is in friction device. Adjusting the pressure of spring to have the tension of film run smoothly, and it's extension is more tighter than the wrap is average and will not become loose.

### **5. WHEN FILM BREAKS :**

- (1) When pre stretch too tight, Film inclines to break. Adjusting the spring nut to control tension.
- (2) Check if film thread is correct.
- (3) Check if the peripheral of tape, change it as the tape is damaged.
